LMC Crystal

GLASS + STAINLESS-STEEL FRAMES

Art Glass & Screen *Inspirations*

Light, texture and form for interiors with character.

A curated collection of glass screens, decorative glass and frame finishes.

SELECTED SCREEN INSPIRATION / P102

Curved silhouettes. Vertical texture. A lighter sense of space.

Glass, framed.

Explore decorative glass and stainless-steel frames as one composition. Start with a screen style, then choose the glass character and frame finish for your interior.

01 **Decorative laminated glass**

Silk, fabric, film and rattan are among the interlayer options.

02 **Fused glass**

Explore texture and light through fused-glass options.

03 **Enamel-coloured glass**

Bring enamel-coloured glass into your material palette.

COMBINE THE EFFECTS

Fluted textures, printed patterns and visual-depth effects can be explored together. Printed depth is a visual effect, not raised relief; confirm the construction and surface by sample.

P101 / Screen inspiration

Vertical lines frame an open view through the interior.

Glass *screens*

Two ways to define a space.

Explore the balance of colour, transparency and frame geometry. Use a style reference to begin your own composition.

MAKE IT YOURS

Share the screen reference, preferred glass code and frame finish with your project dimensions.

P025 Azure geometry

Blue tones with a gold-coloured frame.

P028 Linear clarity

Vertical pattern with a dark frame.

Artful *patterns*

A picture within the partition.

Botanical imagery gives the glass a decorative focus. Compare the arrangement, colours and outline as a starting point for your own design.

MAKE IT YOURS

Share the screen reference, preferred glass code and frame finish with your project dimensions.

P003 Garden reverie

Botanical imagery in a rectangular outline.

P024 Botanical rhythm

Illustrated panels within rounded contours.

Colour *in light*

A softer transition of tone.

Gradients and vertical lines change the visual rhythm of a screen. Consider the surrounding palette and the light on both sides.

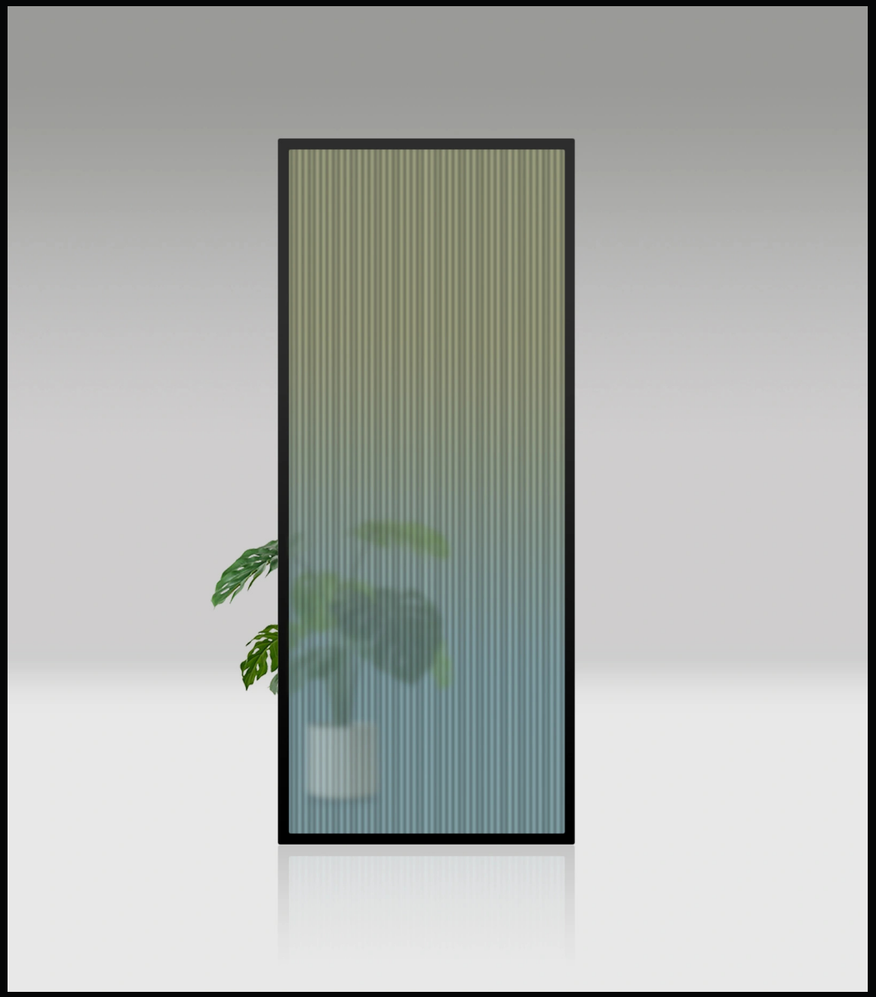

MAKE IT YOURS

Share the screen reference, preferred glass code and frame finish with your project dimensions.

P014 Spectrum lines

A multicoloured gradient with vertical lines.

P016 Coastal fade

Muted green tones fading towards blue.

Curves *& clarity*

Character in the outline.

A sculpted edge or a quiet rounded corner can bring a different rhythm to the glass composition. Choose the silhouette before refining the details.

MAKE IT YOURS

Share the screen reference, preferred glass code and frame finish with your project dimensions.

P023 Organic contours

An interlocking pattern and a wavy outline.

P027 Soft corner

A rounded corner and fine vertical lines.

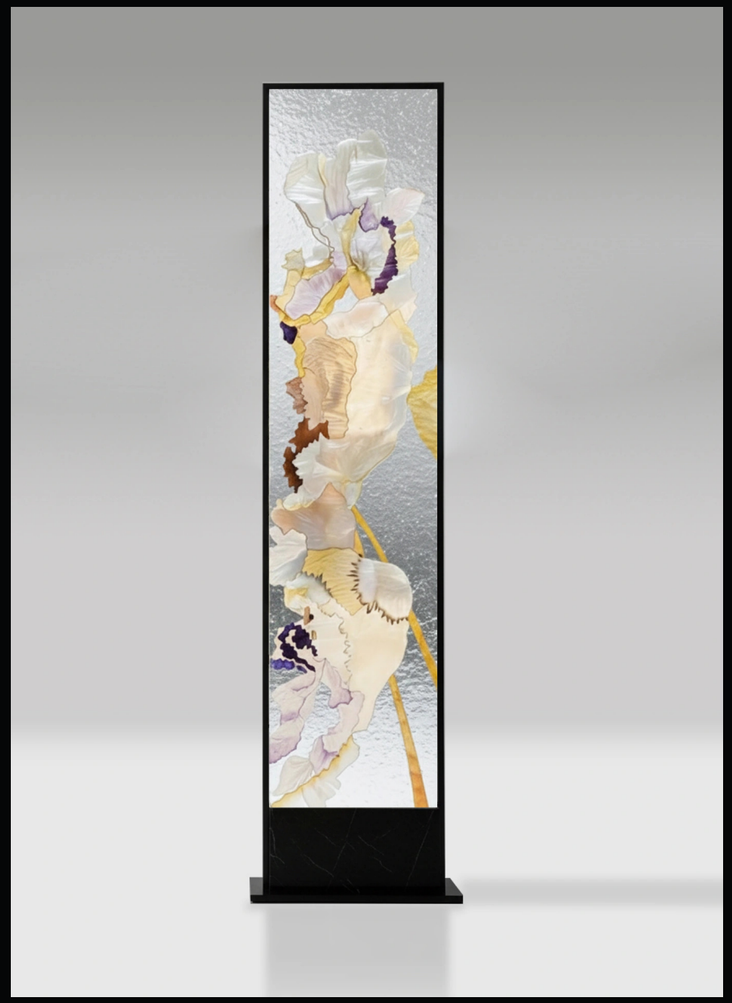

Vertical *accents*

A slender point of focus.

Narrow proportions allow a pattern or a change of colour to take centre stage. Discuss the intended width, height and panel arrangement.

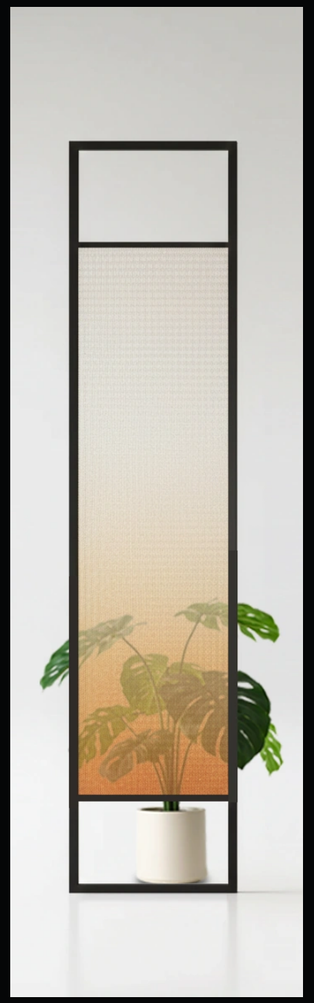

MAKE IT YOURS

Share the screen reference, preferred glass code and frame finish with your project dimensions.

P005 Painterly flow

A slender panel with flowing colour.

P026 Amber veil

Warm amber tones within a slim outline.

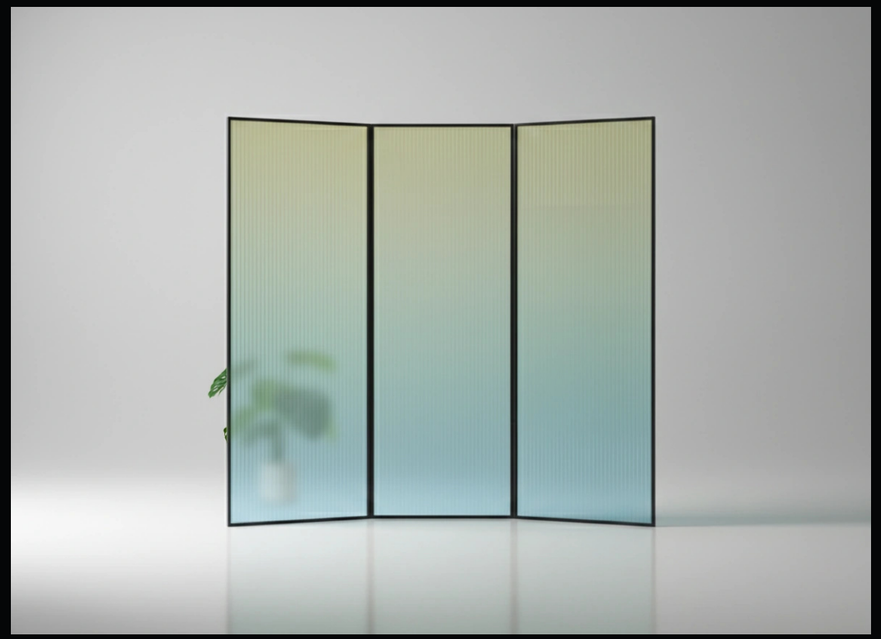

Composed *spaces*

Beyond a single panel.

Explore a group of panels or an expressive standalone arrangement. Use these references to describe the composition you want.

MAKE IT YOURS

Share the screen reference, preferred glass code and frame finish with your project dimensions.

P022 Gradient triptych

Three panels linked by a soft colour transition.

P004 Flowing silhouette

A sweeping dark pattern and a narrow ledge.

Texture *& tone*

A material palette for your next composition.

Explore clear, warm and coloured effects. Quote the order codes shown when requesting samples.

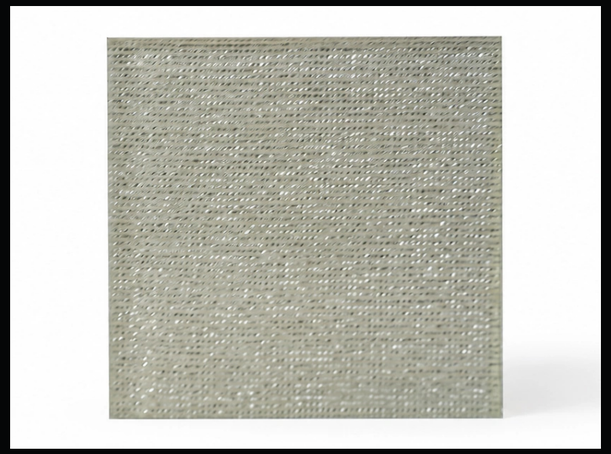

SAMPLE BEFORE SPECIFYING

Confirm colour, texture and light transmission with a physical sample.

One composition, three choices.

Choose a screen style, a glass order code and a frame finish. These pairings offer a starting point for your own selection.

01 Light & quiet

SCREEN STYLE / P028

GLASS

C2021-1492

FRAME

LMC-MAT-001

Natural Silver

A restrained palette of pale glass and natural silver.

02 Warm & layered

SCREEN STYLE / P025

GLASS

C2020-1880

FRAME

LMC-MAT-005

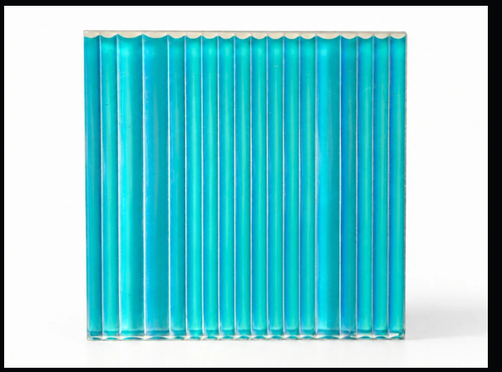

Bronze

Warm glass tones alongside a bronze frame finish.

03 Colour & contrast

SCREEN STYLE / P027

GLASS

C2025-1996

FRAME

LMC-MAT-014

Gunmetal Black

Turquoise glass with a dark, mirror-polished finish.

Pairings are design suggestions. Confirm material compatibility, final appearance and construction for your project.

Start with *a clear brief.*

A few project details help us discuss the direction and prepare a quotation.

Send the references you like together with your drawings or site photos. Include any requirements that matter to the project.

01 Style & material references

Screen P reference, glass order code and LMC-MAT frame finish code.

02 Dimensions & layout

Overall opening or intended screen size, panel layout and quantity.

03 Location & use

Project location, use and privacy preferences.

04 Site & fixing conditions

Floor, ceiling or wall conditions, with drawings or site photos if available.

05 Project requirements

Colour, transparency and any required performance or certification criteria.

06 Timing & destination

Target delivery date, destination and the best contact for project questions.
